

Lewis Hill

curriculum vitae

Employment

August 2009 - October 2010

www.poweradhesives.com

I designed and coded this microsite, as well as styling the eCommerce website linked to it (please click on the UK flag), matching the design to the companies branding as well as designing the logo. I was responsible for preparing the product images for the web, overall design, graphics, SEO and configuration.

September 2010

www.buyexpandos.co.uk

A freelance project for www.packer-products.co.uk, the brief was to design and code a microsite to advertise an exciting new product. I had a tight deadline and next to zero information from the company.

August 2007 - October 2009

www.packer-products.co.uk

Senior Webdesigner including CSS/HTML, designing and maintaining the companies website, including retouching photography, designing graphics, structuring the content and performing SEO.

June 2010

www.duckmylife.co.uk

This is a personal project I am running, in which I will be sending a rubber duck around the world with different photographers as they go on holiday. The rubber duck (Dave) will be photographed at various locations in different parts of the world, and the photos will be uploaded for people to enjoy. The website is based on WordPress and the design, coding and idea were all down to me.

December 2009

www.tradetruster.com

Designed the layout for newly forming company that aimed to make it easier for people to find trusted builders who worked in the area they live in. The layout was produced using a Sketchpad, Adobe Photoshop CS4 and Adobe Illustrator CS4.
